PROFESSIONAL EXPERIENCE

Data Analyst   **Aug 2020 – Present**
Ontario Made Program, Canadian Manufacturers & Exporters (CME), Toronto, ON
- Design, develop and maintain internal ETL pipelines and automation tools with Python enabling cross-functional teams to consume and understand data faster saving 100 labour hours weekly
- Build charts and reports in Python (pandas, matplotlib, seaborn) and Tableau providing complex information in understandable manner to track the established program KPI's
- Act as a liaison between web development and management teams to build and improve the program website using best practices of HTML5, CSS and JavaScript quadrupling the initial membership goal
- Initiate the streamlining of data entry activities in an urgent manner using Python (selenium, BeatifulSoup4) saving an immediate 400 manual labour hours
- Create presentations in PowerPoint to translate and share complex technical information for non-technical audience allowing effective communication with senior management

Data Analyst Assistant   **Nov 2019 – Mar 2020**
International Student Exchange (ISX), Toronto, ON
- Created MySQL queries to extract relevant complex data from multiple tables using joins for conducting further analysis on financial operations, market environment, and logistical aspects
- Developed interactive Excel dashboards with Pivot tables to illustrate sales and marketing effectiveness in an accessible manner for senior executives to support the existing services and create new initiatives
- Organized, transformed, and exported 5000 data entries to provide a smooth transition to a new CRM cloud platform, which synchronized and united the workflows of the company
- Transferred user data as super administrator on G Suite platform to reduce monthly cloud maintenance cost by 50%

Senior Peer Mentor   **Oct 2019 – Apr 2020**
First Year Experience (FYE), Humber College, Toronto, ON
- Streamlined the automation of weekly data entry activities by developing a responsive Excel UI that resulted in an 85% reduction in processing time
- Illustrated FYE program growth and strategic plan on social media platforms by creating interactive dashboards on Tableau presented to program stakeholders such as students, staff, and faculty members
- Transitioned volunteer and program facilitator interaction logs from MS Excel to Google Drive that increased response rate by 120% and allowed to gather twice as much data for future program evaluation
- Delivered monthly leadership workshops to classes of 50 students designed to improve academic and interpersonal skills getting overwhelmingly positive feedback and further invitations
